John

Sorry I didn't see your email come in as it was buried deep in my spam. Earlier this year the Town did indeed eliminate on-site parking regulations for all the uses in the downtown area. Other areas of Town are still required to have on-site parking but even some of the standards uses in zoning were minimized as the regulations were too heavy of a burden for proper site development.

Steve

Good afternoon, Steve,

I hope this email finds you well and willing to entertain a cold email. (If you're like me, parking is too interesting to ignore!)

I'm working with Strong Towns and the Parking Reform Network to catalog municipal parking reforms, and I came across [this story](#) about Wickeburg considering eliminating parking minimums downtown. However, municipal zoning code [Section 14-17-2: Off-Street Parking Requirements](#) seems to include minimums. What is the status of the City's consideration for eliminating minimums?

Thanks very much, Steve. I'm happy to jump on a call if that's easier for you: [REDACTED]  
I look forward to hearing from you. ~ John
